

Avocados: Hawaii Production and Price Improve

Hawaii avocado production for 2011 is estimated at 700 thousand pounds, 6 percent higher than 2010. Both in crop acreage and harvested acreage were 20 acres above the previous year totaling 460 acres and 350 acres, respectively. Average yields remained unchanged from 2010 at 2,000 pounds per acre in 2011. Dry weather continued to hamper the crop in 2011 affecting progress, fruit size, and fruit quality. Growers also mentioned the volcanic haze had affected flowering and fruit set. Majority of the avocados are grown on Hawaii County. More new plantings were reported this year than the previous year.

Farm price averaged 80.0 cents per pound for the 2011 crop, up 3 cents from the previous year. The value totaled \$560 thousand for the year, increasing 10 percent from 2010. ■
